

The 'Official' New Zealand Birders checklist

Compiled by Brent Stephenson and Sav Saville of Wrybill Birding Tours, NZ - www.wrybill-tours.com

The geographical boundary for this list is the political boundary of New Zealand and thus includes the North (N), South (S), and Stewart Island (SI), the New Zealand sub-Antarctic islands (SA), the Chatham (C) and Kermadec (K) Islands, the Ross Sea (RS), offshore islands around these regions, and all waters within 200 nm.

All species counted should be **seen** alive and in the wild (translocated island populations are countable including all species on Tiritiri Matangi, Kapiti Island, Ulva Island, etc.). Beachcast birds, as long as they are still alive, are countable. Birds can not be included in this list based only on hearing calls/song.

Species identified, but not currently on this list should be reported to the New Zealand Rare Birds Committee which is part of the Ornithological Society of New Zealand (OSNZ). Visit their website for forms and further details about which other species listed below should also be reported - www.osnz.org.nz It should be noted that this list has not been reviewed by the OSNZ, and is an entirely independent initiative.

This checklist has been created for personal use, and is not to be used for commercial use, or to be placed on any website, without the permission of Brent or Sav. Please contact us first if you are interested in using it commercially or placing on a website.

Species are colour coded according to their status, endemic (En - pale blue), native breeders (Na - pink), introduced (In - light yellow), and non-breeding migrants/vagrants/stragglers (Nb - white). A total of 365 species are listed, with 100 endemic, 83 native, 43 introduced, and 139 migrant/vagrant/stragglers.
